GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

General.
Establishment.

No. 50.

READ—the following letter from Major J. PENNYCUICK, R.E., Superintending Engineer, Third Circle, to the Chief Engineer, Public Works Department, (through Chief Engineer for Irrigation), dated Bellary, 25th April 1882, No. 131:—

With reference to Colonel Mullins' Memorandum, No. 5 M.D., of 29th July 1881, directing me to undertake the revision of the designs and estimates for the Perryaur Project, I have the honor to state that, although I have had the papers by me for nearly eight months, I have been able to do next to nothing towards the completion of the work.

2. You will remember that in former notes on the subject I said that I did not think it possible for me to work out this project as long as I had current work to attend to, and experience has shown that this opinion was correct.

3. I think that, if I could be relieved of other work for three months, I could submit the papers required in a complete form, and would suggest that this course be adopted.

4. Mr. Nordmann (if no other officer be available) could, I think, take charge of the Circle during my absence, and I should propose to hand over to him towards the end of May; Mr. Garrett, who is about to proceed on privilege leave, will return in the first week of June and might take charge of the Bellary Division, Mr. Nordmann retaining charge of it, in addition to the Circle office, during the few days that might elapse between my departure and Mr. Garrett's return.

5. Mr. Garrett has completed inquiries into, and submitted reports on, two projects (Roddum and Hindupur), and, while in charge of the Bellary Division, would gain information as to the wants and capabilities of the district which could not fail to be of use to him on resuming his regular work.

6. If these proposals be sanctioned I should propose to go to Bangalore while employed on the Perryaur work; it will, of course, be for Government to decide whether the journey will be considered as on duty or not.

7. As far as I can judge at present I shall require two Draftsmen, as there will be a large amount of drawing to be got through in a short time, and a Copyist who should be an intelligent man, as there will be a considerable mass of figures to be copied.

8. I therefore request permission to employ two First-class Draftsmen, a Clerk, IV. Class, 1st Grade, and two Messengers, for the whole of the three months, or for such portion of it as I may consider necessary, the total monthly cost being—

	RS.
1 Clerk	40
2 Draftsmen	100
2 Messengers	14
Total ...	154

9. I do not think it likely that the work will take more than the three months named, but if it should, I will devote to the completion of it the month's privilege leave to which I shall then be entitled.

No. 51.

ORDER—dated 8th May 1882, No. 1164 W., Public Works.

Major J. Pennycuick, R.E., Superintending Engineer, Third Circle, will be specially employed on the revision of the designs and estimates for the Perryaur Project, and will be authorised to entertain the temporary establishment specified below to aid him in the duty :—

	RS.
1 Clerk on	40
2 Draftsmen on Rs. 50	100
2 Messengers on " 7	14
Total ...	154

2. During the currency of the work, Major Pennycuick is authorised to establish his head-quarters at Bangalore, and to join that station and return to Bellary at the public expense.

3. The special duty is calculated to last for three months, and the temporary establishment will be engaged for this period. An appropriation of Rs. 462 to meet the cost is now made from the grant for temporary establishments.

4. During the absence of Major Pennycuick the office of the Superintending Engineer will be placed in charge of Mr. Nordmann, who will also hold the Bellary Division till relieved by Mr. Garrett on return from privilege leave.

5. The sanction accorded in paragraph 1 above is registered as Provincial No. 7 W of 1882-83 and classified as Establishment.

1169/8 Minutes

The proposals herewith made by Major Pennycuick to devote 3 months at Bangalore to drawing up the Periyar Project reached me through Colonel Hasted who was at the time unaware ~~that~~ Major Pennycuick was not only anxious to take up the work in question but required change on account of his health — On explaining this to Col. H it will be observed that he has withdrawn his objection.

Major Pennycuick is an officer who says so little about his health that when he urges the change as a reason (in a d/o to myself) the ~~necessity~~ indulgence assumes a form which calls for such indulgence as I can give — [illegible]

I approve [illegible]

be most unfortunate
of the want of the little
relaxation which this
change may give he
would be compelled to
take sick leave
The Circle has through
Major Penny cuicks ex-
-ertions been getting into
good working order, and
although Mr. Wardmann
may not be considered
as qualified for holding
a permanent post of
the kind he ought to
be able to carry on the
duties of the Office
without serious mistake
for 3 months
Any other arrangement
would lead to a dislocation
of charges which should
I think be avoided &
this policy of generally
appointing the Senior
Executive Engineer of a
circle to officiate for
the Supt. Engineer during
short absences is that
which has with advantage
been followed a similar

No 64/9

occasions lately —

When Mr Garrett assumes temporary charge of the Bellary division early in June his attention will be specially directed to the study of the records in the Office bearing on all projects which may appear worthy of investigation in reference to famine

As regards the transfer of the M I C Canal it may be hoped that this and the necessity for an immediate detailed report may attract measures be deferred till after Major Pennycuick's return ~~to duty~~

Major Pennycuick limits at his journey to & from Bangalore being considered on duty, and I hope no objection will be made to this as I know that owing to the delay in sanctioning the new house scale for the Department by the S of S he was considerably out of pocket, he had to engage a house at Bellary for a long time

in advance of the
actual transfer — in
fact he has ~~told~~ me
privately that the move
has been more than Rs
700 out of pocket

If authorised to make
Bangalore his Head Quarters
while fitting off the Pennyaur
Project there can't be no
question as to the journey
being made at the public
expense, but to prevent
any doubt as to the
equitable character of
the charge I have ~~thought~~
it desirable to note
the above facts for the
H. E.'s information and
consideration

~~RHH~~

The draughtsman mentioned
(para 7) of these Pennyaur
letters will be readily
provided by an ordinary
means.

1164/10

C.N.

Major Pennycuick submits his proposal to be employed specially on the Periyar Project for 3 months thro' the Chief Engr for Irrigation:

I do not think it advisable that Major Pennycuick should give over the Supd. Engineer's charge to a junior officer. The G of I have called for a report on the M. T. & C. Co's works and Major Pennycuick has been directed to furnish this report. Moreover it seems probable that the handing over of the M. T. & C. Co's works to Govt. cannot be long delayed.

Before the end of the year it is probable that several officers will return & Major Pennycuick will have to revert to Exec: Engr. He could then take up a Project Division and complete the Peri[yar] Project.

Jols

1/5/82.

P.T.O.

If, as I [illegible] understand

Major Pennycuick's health

requires that he should leave

Bellary for a time. I [illegible] not

object to this proposal. It is

much better that he should be

employed in getting up the

Periyar Project at Bangalore

than that his services should

be lost by his being compelled

to take leave. If Mr. [illegible]

can take charge of a Division

& such portion of the C. Project

Division Estate as Major

Pennycuick [illegible] require, [illegible]

be available.
